

Motor, Gearbox and Shaft Assemblies

A manufacturer, with a world class reputation for innovative engineering and construction of single and multiple shaft mixing machines, utilizes Super Lube® Oil w/PTFE and Super Lube® Multi-Purpose Grease w/PTFE, as the lubricant of choice for their Gear Boxes, Shafts and Motor Bearings in the production of high speed dispersers, blenders and mixers.

The manufacturer not only applies Super Lube® as a factory fill, but also offers it under a private label version for their aftermarket customer requirements.
