Exposure controls  
Personal protective equipment:  
General protective and hygienic measures:  
The usual precautionary measures for handling chemicals should be followed.  
Immediately remove all soiled and contaminated clothing.  
Wash hands before breaks and at the end of work.  
Do not inhale gases / fumes / aerosols.  
Avoid contact with the eyes and skin.  
Engineering controls: No further relevant information available.  
Breathing equipment:  
Wear appropriate NIOSH respirator when ventilation is inadequate and occupational exposure limits are exceeded.  
Use suitable respiratory protective device in case of insufficient ventilation.  
Protection of hands:  
Protective gloves  
The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.  
Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation  
Material of gloves:  
The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.  
Penetration time of glove material:  
The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.
